

TEKSKIL DirectVIEW Display

Boost production quality with this auxiliary display

Many broadcast studios are realizing the benefits of prompter-mounted Talent Assist/Auxiliary Displays - secondary screens are a great way to share remote feeds and on-air cueing with the talent. Server feeds, Chromakeys, and over-the-shoulder inserts are readily visible without losing eye contact with the camera. Your talent will appreciate the added production support provided by these confidence monitors.

The good news is you don't need to have a prompter to mount a Talent Assist/Aux Panel. Tekskil's wide screen Aux Displays are a great way to make life easier for your on-screen talent and production crew. Tekskil's DirectVIEW system mounts perfectly with today's smaller, lighter cameras & pan/tilt heads - no problems with overloading or balancing your camera system. The display is mounted at the optimum position and angle with micro-truss supports - Tekskil's benchmark design and engineering. Our custom hardware enables mounting to our extruded rail providing for pinpoint balancing.

The DirectVIEW system is also useful as a mobile teleconferencing system or providing point to point visual communication in a Distance Learning application. With a DirectVIEW setup at each end, both sides can see the other and avoid looking off in a radically different direction.

Another popular application for the DirectVIEW system was produced when a broadcast facility wanted to install conventional prompters on ceiling-mounted robotic trolleys. Because of the extremely wide angle of the camera lenses, large glass beamsplitters were required and the resulting torsional forces created lurching and overshoot. Using the lower mass and weight of DirectVIEW displays prevented the lurching and overshooting and solved the problem.

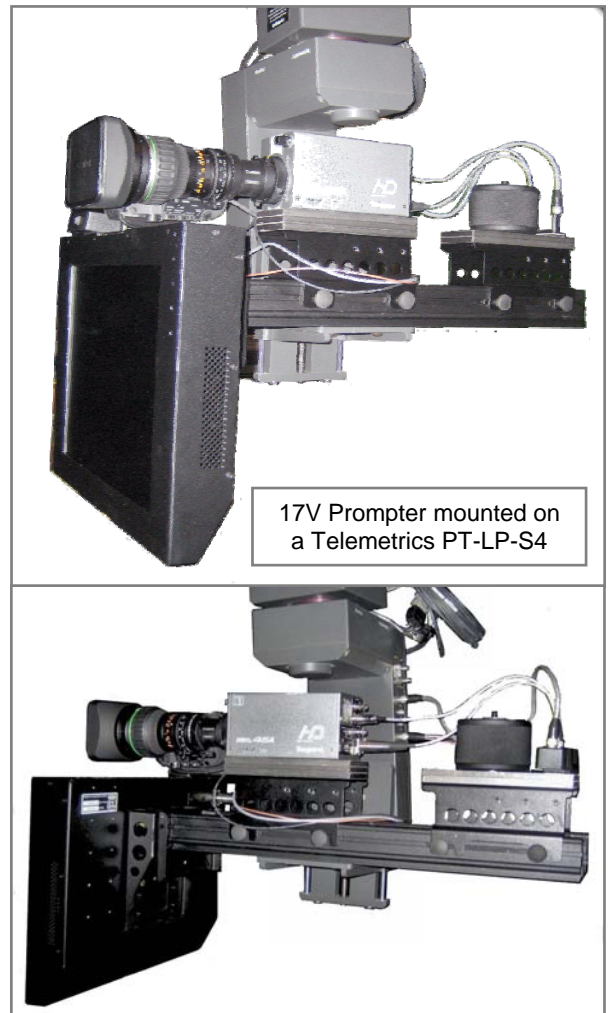

Any Tekskil aux display can be configured in a DirectVIEW application or choose one of our Ultralight Prompters (15, 17 or 22 inch).

Compare features, construction and value with other manufacturers - Tekskil's quality, ease of use and affordability make our prompting systems the best choice for all your prompting needs.

Features of the DirectVIEW System:

- Reduced weight and lower center of gravity
- Continuously variable adjustment provides perfect balance
- Tekskil quality delivers unmatched ease of install, performance and reliability

Set up one of our systems in your studio and see the difference for yourself
