

Tekskil Outdoor Field Monitor

Are your LCD monitors hard to see in direct sunlight?
Do they suffer from overheat shutdowns?

When you absolutely need a prompting monitor that works *anywhere*

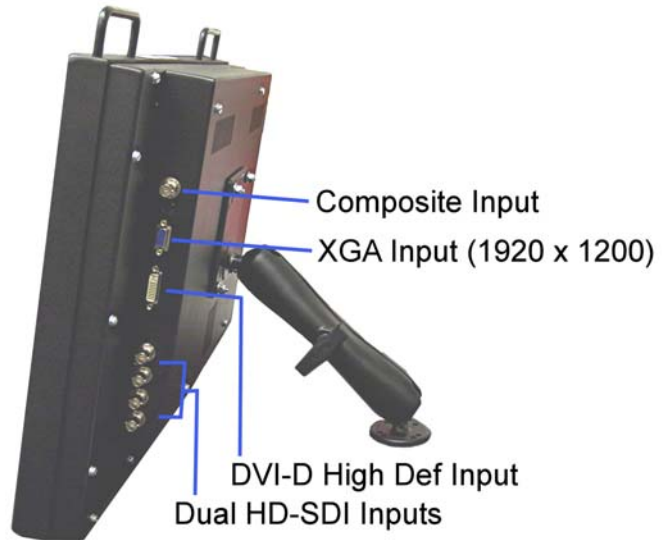

Tekskil Field Monitors are a match for any presentation setting, including bright overhead lights, even direct sunlight. And built to handle the rigors of a demanding road schedule.

Professional presenters really appreciate Tekskil's **24FM Field Monitor**. This display combines the latest generation of transfective high-def LCD monitors, custom support electronics, and a ruggedized metal enclosure for the best in performance and dependability. Outdoor viewability is accomplished by Tekskil's custom screen enhancements - a pair of ultra thin ion-enhanced glass films which are bonded to the front of display. This light management layer directs specific wavelengths of ambient sunlight into a reflective cavity to boost display brightness while reflecting out the IR waves that cause conventional panels to 'cook'.

Specifications

LCD-24FM

Panel Type:	High Bright Active Matrix TFT LCD
Screen Size (HxV):	24 inch Diagonal (20.4" x 13.0")
Pixel Format (RGB):	1920 x 1200
Aspect Ratio:	16 x 10
Pixel Pitch:	0.270 (H) x 0.270 (W)
Pixel Format:	RGB Vertical Stripe
Pixel Retrace Time:	8 msec
Contrast Ratio:	1000:1
Display Colors:	16,777,216 (True 8-bit)
Viewing Angle (H/V):	178° x 178°
Lamp Life:	50,000 Hours
